

Data Security & Privacy Policy

At AamoBee, we understand that your business data is one of your most valuable assets. That's why we are fully committed to protecting your privacy, securing your information, and ensuring you have complete control over your data at all times.

Below is our clear and transparent policy on how your data is handled, stored, and protected.

1. Secure Cloud Infrastructure

- All your data is stored on secure, cloud-based servers provided by trusted global infrastructure providers.
 - These servers are located in highly protected data centers with multiple layers of physical and digital security.
 - All communication between your device and our servers is encrypted using industry-standard HTTPS/SSL encryption.
-

2. Data Privacy and Confidentiality

- We do not access, view, or use your business data unless **explicitly requested** by you for support or troubleshooting purposes.
 - All sensitive data, including client records, invoices, financial information, and documents, are **accessible only by you or your authorized users**.
 - We have strict internal controls in place to prevent unauthorized access to any user data.
-

3. No Selling or Sharing of Data

- AamoBee **does not sell, rent, or share** your data with any third-party vendors, advertisers, or partners.
 - Your data will never be used for marketing, analytics, or any activity unrelated to your business account.
 - We fully respect your right to confidentiality and data ownership.
-

4. Role-Based Access Control

- You control who in your team can access specific data.
 - With our role-based permissions system, you can assign view-only, edit, or full-access roles to staff users.
 - This ensures data is only available to the people you trust within your organization.
-

5. Backups and Redundancy

- Your data is automatically backed up at regular intervals to prevent loss in case of system failure.
 - Multiple backups are stored in secure locations, ensuring quick recovery and continuity in the event of a technical issue.
 - Backup data is also encrypted and protected with the same level of security as live data.
-

6. Transparency and User Rights

- You have the right to request a copy of your data or request deletion of your account at any time.
- You can export your data in standard formats for offline storage or migration.

- If you choose to stop using AamoBee, your data will be deleted securely upon request after a grace period, unless required to be retained by applicable laws.
-

7. Compliance and Standards

- AamoBee follows best practices for data protection aligned with international standards like GDPR (General Data Protection Regulation) and local laws (such as India's IT Act).
 - We continually monitor and upgrade our systems to meet the highest security and privacy benchmarks.
-

8. Our Commitment

Your trust is central to everything we do. That's why:

- We prioritize **privacy by design** in every new feature we build.
 - We continuously invest in improving data security protocols.
 - We treat your business information with the same care and confidentiality we expect for our own.
-

Need Help?

If you have any concerns or questions about how your data is handled, please contact us at: **privacy@aamobee.com**
