

Billing & Subscription Model – Full Transparency

At AamoBee, our goal is to offer powerful business tools with simple and transparent pricing. We understand how important predictable costs, clear terms, and data security are to your business. Here's everything you need to know about how our billing system works.

1. Module-Based Pricing

AamoBee uses a modular pricing model so you only pay for what you need.

- Each feature or module (like Invoicing, CRM, Inventory, etc.) is priced at a flat rate of ₹125 per month.
- This cost applies per module. If you choose more than one module, the cost increases accordingly.
- You can build your own plan based on your business size, industry, and workflow.

For example:

If you use 3 modules (Invoicing, Inventory, CRM), your total would be $₹125 \times 3 = ₹375$ per month (before discount and taxes).

2. Annual Subscription Billing

Although we display monthly pricing for clarity, all plans are billed annually in advance.

- You will pay upfront for 12 months at the time of purchase.
- This approach helps keep your cost lower compared to month-to-month plans.
- It also provides better planning, uninterrupted access, and reduced administrative work.

Example:

If you subscribe to 2 modules, your annual cost before discount and taxes will be:

$\text{₹}125 \times 2 = \text{₹}250$ per month $\rightarrow \text{₹}250 \times 12 = \text{₹}3,000$ per year.

3. Inaugural Discount (25% Off)

To support early adopters, we are currently offering a 25% discount on all new annual subscriptions.

- The discount is applied automatically at checkout.
- It applies to all modules selected at the time of purchase.
- No coupon code or promo code is needed.

Using the example above:

$\text{₹}3,000$ per year $- 25\% = \text{₹}2,250$ per year (before applicable taxes).

4. Tax and Country-Specific Charges

Taxes are applied as per the business location and country regulations.

- In India, GST will be added to the invoice as per current government rules.
 - In the UAE and other supported countries, VAT or regional taxes may apply.
 - The final invoice will clearly show the base price, discount, tax amount, and total payable.
-

5. Immediate Access After Payment

Once your payment is successfully completed:

- Your selected modules will be activated immediately.

- You can start using the platform without any manual verification or delay.
 - A digital receipt and invoice will be sent to your registered email.
 - You'll have access to all features of the purchased modules from day one.
-

6. Adding More Modules Later

- You can add new modules anytime after your initial subscription.
 - Charges for new modules will be calculated on a pro-rata basis, based on how many days are left in your subscription year.
 - This ensures you pay only for the duration you use the new modules, not the full year again.
-

7. Subscription Renewal

- Subscriptions are not auto-renewed by default.
 - You will receive reminders well in advance of your renewal date via email and/or WhatsApp.
 - You can renew your subscription manually from your dashboard.
-

8. Currency and International Payments

- All Indian customers will be charged in INR.
- Customers outside India will be charged in their local currency (such as AED or USD), as supported by our payment gateway.
- If currency conversion is required, it will be done at real-time exchange rates via Stripe.

Summary

Feature	Description
₹125/month/module	Pay only for the modules you use
Annual billing upfront	Billed for 12 months at the time of subscription
25% discount	Limited-time offer for new users
Country-specific taxes	Applied according to your billing country
Pro-rata pricing for new modules	Add modules anytime, pay only for the remaining period
No auto-renewal	Manual control over renewal and billing
Immediate module access	Use features right after successful payment
