

Live Now – Ready to Use

Inventory Management – Built for Every Industry, Flexible for Every Business

In any business that deals with goods—whether it's trading, retail, manufacturing, or services—**inventory is key**. AamoBee's Inventory Management module is designed to help businesses of all types and sizes **track, control, and plan** their stock operations without complexity.

What It Does

The Inventory module helps businesses:

- Enter and track stock manually
- Monitor quantity in and out across items
- Handle raw materials and finished goods
- Adjust inventory based on actual usage and consumption
- Keep records of items sold via invoicing

All this happens within a **dynamic, easy-to-use dashboard**, completely customizable for your business needs.

What AamoBee Offers in Inventory Management (Now)

1. Manual Inventory Entry – Simple Yet Powerful

- Users can manually add products, raw materials, and other stock items
- Each item entry includes name, category, unit, rate, quantity, and description
- Add items as needed—no technical setup required

No barcode systems or complex integrations—**just your logic, your data, your way.**

2. Track Raw Materials and Finished Goods

- Businesses can define **recipes or structures** (e.g., 3kg raw input = 1 finished item)
- When finished goods are created, raw material quantity is auto-adjusted
- Helps manufacturers and producers track input/output efficiently

Ideal for **manufacturing units, food businesses, packaging, fabrication**, and more

3. Live Stock Balance with Real-Time Adjustments

- Get live inventory status based on purchases, consumption, and sales
- Stock updates happen as soon as an invoice is created
- Maintain clarity on what's in stock, what's used, and what's sold

Say goodbye to guesswork—know your real inventory position anytime

4. Cross-Industry Compatibility

AamoBee's Inventory module is built to be **industry-agnostic**. Whether you're in:

- Retail (apparel, grocery, electronics)
- Manufacturing (raw to finished goods)
- Services (spare parts, tools, consumables)
- Hospitality (restaurant ingredients, kitchen stock)
- Healthcare (medicines, supplies)

...it adjusts to your needs.

5. Connected with Invoicing

- Whenever an invoice is created, the inventory gets updated instantly
- Reduces manual duplication
- Automatically adjusts stock based on sales

All systems talk to each other, without extra effort.

Key Benefits

- Manual stock input for full flexibility
 - Raw-to-finished product tracking
 - Multi-item and multi-category organization
 - Simple dashboard to view stock movements
 - Fully connected with other modules like Invoicing & Client Management
 - Designed for **Indian & international businesses**
-

Pricing

- **₹125/month only**
 - Use it as a single module or combine with others like Invoicing and CRM
 - No extra fees, no hardware dependency
-

Who is it For?

- Small to medium-sized businesses
 - Retail shops and store owners
 - Manufacturing units
 - Traders and wholesalers
 - Service providers with parts or stock
 - Any business that needs to **track and control inventory in a simple way**
-

Coming Enhancements (Optional Roadmap)

- Batch tracking
 - Expiry alerts
 - Barcode integration (*planned*)
 - Stock transfers between locations
 - Auto-purchase recommendations
-

Invoicing – Smart, Simple, and Global

Invoicing is at the heart of every business transaction—whether you're a freelancer, a retailer, or a global exporter. AamoBee's Invoicing module is designed to make billing fast, professional, and completely compliant with your business rules—across **countries, currencies, and industries**.

What It Does

AamoBee's Invoicing module allows you to:

- Create clean, professional invoices in seconds
 - Apply GST or other country-specific tax systems
 - Track client payments and dues
 - Share invoices directly with customers via WhatsApp or email
 - Work in multiple currencies, suitable for global businesses
-

What AamoBee Offers in Invoicing (Right Now)

1. GST-Ready Invoice Formats (and Custom Tax Configurations)

- Choose from multiple GST-compliant templates
- Add SGST, CGST, IGST automatically based on client location (in India)
- Customize tax settings for international standards (VAT, Sales Tax, etc.)
- Dynamic HSN/SAC code field
- Tax-included or tax-exclusive billing—your choice

Whether you're billing in Delhi or Dubai, your invoice will match local laws.

2. Instant Invoice Sharing via WhatsApp & Email

- Generate the invoice and send it to your customer instantly
- No need to download, convert, or manually attach
- Supports direct WhatsApp sharing for faster delivery and confirmations
- Auto-pulls client details if already added in CRM

Faster sharing = faster payments.

3. Payment Tracking & Reminders

- Mark invoices as paid, partially paid, or unpaid
- Add payment mode and reference number for full records
- Set due dates and get dashboard alerts
- Send automated or manual payment reminders

Never lose track of what you're owed.

4. Multiple Templates & Branding Options

- Choose from a range of pre-designed invoice layouts
- Add your **company logo, header, footers, terms, and custom notes**
- Select color themes and layout orientation (print & digital friendly)

Make your invoice look like **your brand**, not just another PDF.

5. Multi-Currency Invoicing (Multi-Country Support)

- Choose invoice currency as per the client's location
- Define exchange rates for better tracking
- Tax format adjusts based on firm's or client's country
- Works seamlessly for businesses operating in more than one country

Perfect for businesses working with clients in **India, UAE, US, UK, or anywhere else.**

Designed for Global Use

- Add clients from different countries
- Use INR, AED, USD, GBP, or any currency you want
- Tax and formats change dynamically based on region
- Set **default currency per firm or per invoice**

You focus on business. AamoBee handles the complexity.

Invoicing Reports & History

- View **invoice-wise, client-wise, or date-wise reports**
 - Download monthly GST reports (for Indian users)
 - Export invoice logs to Excel or PDF
 - View payments received vs pending at a glance
-

Who Can Use It?

- Freelancers and consultants
- Traders and manufacturers
- E-commerce sellers
- Service businesses
- Multi-location or multi-country companies
- Accountants managing client billing

Pricing

- Just ₹125/month
- No extra fee for multi-currency or GST features
- Combine with CRM, Client Management, or Inventory for a full flow

Coming Enhancements

- Recurring invoices
- Credit note & debit note support
- Invoice automation for repeat customers
- Custom reminders
- Invoice-to-payment auto linking

In Summary:

AamoBee's Invoicing module gives you everything you need to **bill smarter, track payments, and grow with confidence**—without the usual complexity or cost.

CRM & Leads – Convert More Leads, Build Better Relationships

In any business, leads are opportunities—and the way you manage them can make or break your growth. AamoBee's **CRM & Leads module** helps you capture, organize, follow up, and convert your leads efficiently—all from one centralized, easy-to-use system.

It's your all-in-one **Client Relationship Management** tool, designed to help you **close more deals, track communications, and stay organized**—whether you're a solopreneur or managing a large sales team.

What It Does

With AamoBee's CRM & Leads module, you can:

- Capture new leads manually or from inquiries
- Track their progress in your sales pipeline
- Set follow-up reminders
- Assign leads to team members
- Record every interaction with notes and tags

Whether you're following up via call, meeting, or email—everything is saved and updated in one place.

What AamoBee Offers in CRM & Leads

1. Lead Capture and Categorization

- Add new leads manually, import from Excel, or connect via other modules
- Capture key lead info: name, contact details, source, interest level, and more
- Group leads into categories: hot, warm, cold, follow-up, converted
- Add tags for easy searching (e.g. “repeat client,” “priority,” “follow-up in 3 days”)

Never lose a potential client again—every lead is tracked from day one.

2. Follow-Up Reminders & Status Updates

- Set reminders for calls, meetings, or demos
- Choose reminder type: daily, one-time, or custom
- Update lead status: new, contacted, interested, negotiating, closed, lost
- Get notified on dashboard about today's pending actions

Consistent follow-ups = higher conversion rates.

3. Sales Pipeline Tracking

- Visualize your sales process from lead to deal closure
- Move leads through different pipeline stages
- Monitor how many leads are in each stage
- Identify bottlenecks or delays in your sales process

Stay in control of your sales journey—know what needs action, and when.

4. Assign Leads to Team Members

- Distribute leads across sales reps, agents, or departments
- Track who is working on which leads
- Control access—each team member sees only their assigned leads
- Great for teams with multiple salespeople or regions

Shared visibility, individual responsibility—maximum team efficiency.

5. Notes, Tags & Communication Logs

- Add detailed notes after every call or meeting
- Save context for future follow-ups
- Use custom tags to group and filter leads easily
- Maintain a full history of every touchpoint

No more missed info or miscommunication—everyone stays updated.

CRM Reports & Insights

- Lead source report (where leads are coming from)
 - Conversion rate tracking
 - Lead aging report (how long a lead is open)
 - Team performance reports (who's converting most leads)
-

Multi-Firm & Multi-User Ready

- Use one CRM dashboard for all your firms
 - Switch between firms easily
 - Assign leads across regions or business units
 - Role-based access to control visibility
-

Who Can Use It?

- Sales teams
 - Marketing teams
 - Business development managers
 - Consultants and agencies
 - Anyone who deals with customer leads
-

Pricing

- Just ₹125/month
 - Connect with Invoicing, Client Management, and other modules for full business automation
-

Coming Enhancements

- Lead capture form integration (website, WhatsApp, social)
 - Email/SMS automation
 - Lead scoring & prioritization
 - Activity timeline for each lead
-

In Summary:

AamoBee's CRM & Leads module gives you the tools to **nurture relationships, increase conversions,** and **build stronger client pipelines**—without complicated CRM systems or expensive tools.

Client Management – Organize Smarter, Serve Better

Whether you're a service provider, a consultant, a manufacturer, or a multi-location enterprise, keeping client data organized is crucial to providing a great experience. AamoBee's **Client Management module** helps you store, manage, and retrieve client information instantly—so you stay focused on building relationships, not chasing spreadsheets.

What It Does

The Client Management module allows you to:

- Store and manage complete client profiles
 - Track client interactions and transaction history
 - Link each client to invoices, leads, and projects
 - Add internal notes, reminders, and custom tags
 - Quickly find any client detail with smart filters
-

What AamoBee Offers in Client Management

1. Store Client Details, Documents & Payment History

- Maintain complete profiles: company name, contact info, GST/VAT number, address, etc.
- Upload important documents (e.g., contracts, agreements, KYC, ID proofs)
- View invoice and payment history per client
- Know at a glance what is due, paid, or overdue

One place to manage all things related to each client—secure, structured, and fast.

2. Add Notes and Reminders

- Add private notes for internal use (e.g., client preferences, follow-up points)
- Set reminders for calls, meetings, or renewals
- Add contextual tags like “VIP client,” “New lead,” or “Pending documents”

Stay informed, stay ready—never miss a client need or deadline.

3. Link Clients to Invoices, Projects & Leads

- Auto-connect invoices and payments to each client profile
- Link open leads or sales opportunities
- Track project progress and assigned tasks
- View everything related to a client in one screen

A 360° view of every client—transactions, history, and touchpoints.

4. Quick Search & Smart Filters

- Search by name, email, company, phone number, or tags
- Filter clients by status, activity, city, industry, or outstanding balance
- View reports by active, inactive, or high-value clients

Find what you need in seconds—even with thousands of client records.

5. Secure Data Handling

- All client data is stored securely with encrypted access

- Role-based access lets you control who can view or edit client info
- Audit logs track every change or update made to records

Your clients' information is safe—and always in your control.

Multi-Firm & Global Ready

- Manage clients for multiple firms under one account
- Works for clients across different countries and currencies
- Supports multiple tax formats (GST, VAT, Sales Tax)
- Client-specific settings for communication and billing preferences

Serve clients globally—without switching platforms.

Client Reports & Insights

- Outstanding payment report
 - Client activity logs
 - Most billed clients
 - Client-wise sales summaries
 - Location or industry-based segmentation
-

Who Can Use It?

- Agencies and consultants

- Accountants and service providers
 - Retailers and wholesalers
 - Real estate and legal professionals
 - Any business that wants to **maintain long-term client relationships**
-

Pricing

- Just ₹125/month
 - Seamlessly works with CRM, Invoicing, and Project Management modules
-

Coming Enhancements

- Client communication logs (emails/SMS tracking)
 - Auto client rating based on history
 - Contract expiry alerts
 - Custom client fields and categories
-

In Summary:

With AamoBee's **Client Management module**, you get a powerful, organized, and secure way to **store client information, manage history, and deliver better service.**

It's more than a contact book—it's the foundation for strong customer relationships.

Retail Billing – Simple, Fast Billing for Shops & Service Counters

Retail businesses need a quick and accurate way to generate bills—whether it's a busy shop floor, a service counter, or a small business office. AamoBee's **Retail Billing** module helps you create and manage customer bills with ease, ensuring fast transactions and smooth operations.

Built for simplicity, the module works across industries—from general stores to service providers—without requiring any special setup or hardware.

What It Does

AamoBee's Retail Billing module allows you to:

- Search and select items quickly during checkout
 - Apply GST or other taxes automatically
 - Generate bills with customer and item details
 - Offer print or digital receipts
 - Track daily sales totals and billing history
-

What AamoBee Offers in Retail Billing

1. Quick Item Search & Billing

- Instantly find products by name, category, or code
- Add items to the bill with a single click
- Adjust quantities, apply discounts, and update prices in real-time
- Auto-update inventory levels after each bill

Fast billing, less waiting—ideal for busy counters or quick checkouts.

2. GST/Tax Inclusive Pricing

- Support for tax-inclusive and tax-exclusive prices
- Auto calculation of SGST, CGST, IGST (for Indian users)
- Custom tax settings for different countries
- Tax break-up shown clearly on each bill

Tax-ready bills without extra effort—no manual calculations needed.

3. Print & Digital Receipts

- Download or print receipts with all transaction details
- Include company logo, invoice number, date, and tax breakdown
- Share bills via email or WhatsApp for customer convenience
- Save a digital copy for records

Serve your customers better with professional, branded bills.

4. Daily Sales Summary

- View total sales done each day
- Filter sales by date, customer, or product
- Track revenue trends over time
- Export sales reports to Excel or PDF

Know how much you made—day-by-day, item-by-item.

5. Multi-Item & Multi-Tax Support

- Add multiple products or services to a single bill
- Apply different taxes on different items if needed
- Supports bulk billing and split quantity entries

Flexible billing, just the way your business needs it.

Global & Multi-Currency Friendly

- Works across all countries
- Supports billing in multiple currencies
- Auto-adjusts tax formats based on your business location
- Set up different billing formats for each firm

Whether your store is in India, UAE, or anywhere else, AamoBee is ready.

Who Can Use It?

- Retail stores (apparel, electronics, grocery, etc.)
 - Service counters (repair shops, salons, clinics)
 - Freelancers or small businesses that offer on-the-spot sales
 - Traders or vendors managing walk-in clients
-

Pricing

- Just ₹125/month
 - Works great alongside **Inventory, Invoicing, and Client Management** modules
-

Coming Enhancements

- POS-style interface for faster, touchscreen billing
 - Barcode scanning and printing
 - Return & refund processing
 - Loyalty and discount programs
-

In Summary:

AamoBee's Retail Billing module gives small and mid-sized businesses the power to **bill customers quickly, professionally, and accurately**, without investing in expensive POS systems.
