 - Make payments for outstanding invoices.
 - Access statements and financial documents shared by the firm.
 - Submit support tickets and access the help desk.

Permissions and Roles for Single or Multiple Firms

Single Firm Users

- **Master Admin:**
 - Access and manage all aspects of a single firm and its users.
- **Client Admin:**
 - Manage all aspects of the single firm under the client account, including user permissions and financial data.
- **Firm Admin:**
 - Administer the single firm, manage users, and handle all financial activities.
- **Accountant:**
 - Perform financial tasks and generate reports for the single firm.
- **User (General Employee):**
 - Submit financial documents and view personal metrics within the single firm.

- **Viewer:**
 - View financial data and reports for the single firm.

Multiple Firm Users

- **Master Admin:**
 - Access and manage multiple clients and all their firms, configure global settings, and monitor system-wide activities.
- **Client Admin:**
 - Manage multiple firms under the client account, including firm-specific settings, user management, and financial data.
- **Firm Admin:**
 - Administer multiple firms, configure settings for each firm, and manage users and financial activities within each firm.
- **Accountant:**
 - Perform financial tasks and generate reports for multiple firms, ensuring compliance with each firm's specific laws and taxes.
- **User (General Employee):**
 - Submit financial documents and view personal metrics across multiple firms, with firm-specific access and permissions.
- **Viewer:**
 - View financial data and reports for multiple firms, with firm-specific read-only access.

Additional Considerations

- **Audit Logs:** Ensure all user activities are logged and can be audited for security and compliance.
- **Role-Based Dashboards:** Provide customized dashboards for each role to enhance user experience and efficiency.
- **Notification System:** Implement a robust notification system to keep users informed about relevant activities, approvals, and alerts.
- **Access Control:** Regularly review and update access controls to ensure compliance with security policies and regulations.
